

Joel Solis

Nottingham, United Kingdom | joelsolisa117@gmail.com | +44 7340 959135

PROFILE:

Final-year Computer Science student (Nottingham) building AI and game systems in C++, Java, and Python. Hands-on with algorithms, data structures, AI, and Agile development. Seeking a summer internship in software engineering or game development.

EDUCATION

University of Nottingham

BSc (Hons) Computer Science, Second Year Average: 69% - High 2:1, Expected Classification 2:1 or above

Nottingham, UK
(2024-2027)

Aarhus Universitet

Summer University, Studied Software Design in C++ under Dr Bjarne Stroustrup and Viking Age Archaeology .

Aarhus, Denmark
(2026)

EXPERIENCE

University of Nottingham

IT Smart Bar Assistant

Nottingham, UK
(2026-Present)

Assisting students with all issues related to the University's digital infrastructure and a range of network and IT service issues. Communicate technical solutions to users with varying levels of technical experience.

HackSoc Nottingham

Workshops Secretary

Nottingham, UK
(2025-2026)

Organised HackSoc's workshop events, delivering and facilitating 5 technical sessions with approximately 50–75 total attendees between all sessions. Personally delivered 4 workshops on Advent of Code, game development, Unity, and C++, covering topics including competitive programming, game design, game mechanics, game engines, and modern successors to C.

University of Nottingham, School of Computer Science

Team Leader & Game Programmer

Nottingham, UK
(2025-2026)

Led a year-long software engineering project developing an online adaptation of De Bellis Antiquitatis in Unity and C#, using Agile and DevOps principles to manage delivery and contribute to gameplay, debugging, and integration features. Supervisor nominated the project for Best Project recognition due to strong team performance and delivery.

PROJECTS

Hyper-Heuristic for a TSP Style Optimisation Problem

Java | Second Year Coursework

Designed and developed a selection learning hyper-heuristic and problem domain for solving instances of a Travelling Salesman Problem style optimisation problem.

Operating Systems Simulator

C | Second Year Coursework

Developed a concurrent operating systems simulator with designed thread safe data structures, using a round robin scheduler with the simulation of blocking processes and a priority daemon.

CS50 Final Project

Python/Flask | CS50, Harvard Online

Developed a small-scale educational web app with SQL integration to support Spanish learning, including user authentication and progress tracking.

SKILLS AND INTERESTS

- Skills: C++, Java, Python, Haskell, SQL, Algorithms, Git, Linux, Unity, Object Oriented Programming, Data Structures, Concurrency, Databases, DevOps, Software Development, Agile Methodologies, CI/CD, Teamwork, Leadership, Communication, Critical Thinking.
- Languages: Spanish (Native), English (Fluent), Japanese (Beginner)
